PROFESSIONAL SUMMARY

B.Tech Computer Science graduate (Sharda University, 2025) with hands-on full-stack development experience across React, FastAPI, Flask, and PostgreSQL. Built and deployed REST APIs with JWT authentication, normalized relational schemas, and responsive frontend interfaces using Git-based version control. Strong foundation in OOP, DBMS, and software development lifecycle, seeking a Software Developer / Full-Stack Developer role.

TECHNICAL SKILLS

- Languages: C++, Python, JavaScript, HTML, CSS, SQL
- Frameworks & Libraries: React.js, Flask, FastAPI, Tailwind CSS, Pandas, NumPy, TensorFlow
- Tools & Practices: Git/GitHub, REST API Design, JWT Authentication, Postman, VS Code, Chrome DevTools, Figma
- Databases: PostgreSQL (schema design, normalization)
- Core CS Concepts: Object-Oriented Programming (OOP), Database Management Systems (DBMS), Data Structures, Software Development Lifecycle (SDLC)
- Productivity: Microsoft Office (Word, Excel, PowerPoint)

INTERNSHIP EXPERIENCE

Frontend Development Intern — PearlThoughts

Jul 2025 – Aug 2025

- Developed responsive, cross-browser-compatible UI components using HTML, CSS, JavaScript, and React.js, improving consistency across 3+ browser environments
- Collaborated with senior developers to identify and resolve UI/UX issues, contributing to measurable improvements in page load and rendering performance
- Used Git for version control and participated in code review cycles, strengthening collaborative development practices

ACADEMIC PROJECTS

Stock Price Prediction Using Deep Learning *Python, Pandas, NumPy, Matplotlib, TensorFlow/Keras (LSTM)*

- Built and trained an LSTM deep learning model to forecast stock closing prices using historical time-series data
- Engineered an end-to-end pipeline covering data preprocessing, model training, evaluation, and visualization
- Integrated live data ingestion via the Yahoo Finance API and benchmarked model accuracy against Linear Regression and ARIMA baselines

WorkNest — Coworking Spaces Booking Platform

FastAPI, Flask, React, PostgreSQL

- Architected a full-stack web application for managing coworking space listings and real-time bookings, using modular REST API design with FastAPI and Flask
- Implemented JWT-based authentication and role-based access control for secure user login
- Designed a normalized PostgreSQL schema across spaces, users, and bookings to ensure data integrity
- Built CRUD-based booking functionality with real-time availability tracking, integrating a React frontend with the backend via REST APIs
- Managed version control and collaborative development workflow using Git/GitHub

EDUCATION

Bachelor of Technology, Computer Science — Sharda University, Greater Noida, U.P.

2021 – 2025

- CGPA: 7.2 / 10

CERTIFICATIONS

- Introduction to Front-End Development — Meta, via Coursera (July 2025)
- The Complete 2022 Web Development Bootcamp — Udemy (August 2022)
